Education

Dayananda Sagar College of Engineering Bengaluru, KA
Bachelor of Engineering in Computer Science *Aug. 2023 – Present*

Technical Skills

Languages: JavaScript, TypeScript, Python, C++, C, Bash
Frameworks/Libraries: Node js, React.js, Next.js, Express.js
Databases: Supabase (PostgreSQL), MongoDB
Tools & Platforms: Linux, Git, GitHub, Docker, Postman, VS Code, AWS, Azure
AI & Automation: Agentic AI Workflows, LLM Integration, Prompt Engineering, Security Automation

Experience

Raison May 2026 – Aug 2026
Software Engineer Intern *Paris – Remote*

- Built a bilingual (EN/FR) marketing platform using Next.js, Payload CMS, PostgreSQL, and PostHog, with interactive product demos,Survey lead capture, and SEO/AEO.
- Architected and developed a standalone Node.js service using Vercel Chat SDK, integrating WhatsApp with the existing AI tutor through authenticated APIs and supporting quizzes, learner identity and interactive messaging.
- Delivered an end-to-end WhatsApp AI tutoring experience, enabling learners to access the production tutoring agent, courses, quizzes, and teacher messages directly through WhatsApp.

Projects

Scoutly | *Python, TypeScript, Eve, Trigger.dev, Supabase, Next.js* [GitHub | Live]

- Built an automated lead-qualification pipeline that scrapes YC companies and uses an AI agent to research and enrich company data.
- Orchestrated per-company enrichment with Trigger.dev, implementing bounded concurrency, exponential-backoff retries, and idempotent execution for reliable batch processing
- Developed a natural-language query interface that generates SQL, validates read-only queries, and executes them within PostgreSQL read-only transactions

LifeGrid | *JavaScript, Cloudflare Workers, HTML, CSS, SVG, Zod* [GitHub | Live]

- Built and open-sourced a dynamic wallpaper generation platform serving 500+ daily active users
- Designed a serverless SVG-to-PNG rendering pipeline using Cloudflare Workers and resvg-wasm for high-resolution wallpaper generation
- Implemented secure query validation and input sanitization using Zod to prevent malformed or malicious requests

Open Source Contributions

AperiSolve (Maintainer & Contributor) Contributions
Contributed multiple pull requests to improve functionality and reliability; integrated Sentry for real-time error monitoring. Fixed CI/CD pipelines and Analyzers.

Vercel/streamdown (Contributor) Contributions
Delivered multiple PRs enhancing Markdown UX: improved image fallback handling, implemented table export as Markdown, optimized Mermaid rendering, and added accessibility improvements.

Vercel/Chat-SDK (Contributor) Contributions
Contributed multiple merged PRs to Vercel's open-source Chat SDK, improving cross-platform messaging capabilities across WhatsApp and Google Chat. Enhanced CTA buttons, typing indicators, card/file handling, and Google Chat link formatting.

Achievements & Involvement

Decipher Blitz 1st Place
Solo CTF with timed challenges under 5 minutes; finished 1st organized by Aegis Club Cyber Sec Dept.

TechnoSeek 1st Place
Competitive CTF event combining flag solving with a treasure hunt experience; our team secured 1st position.
